

Estimated Coil Weight Information

Coil Width	Coil O.D.								
	36"	42"	48"	54"	60"	66"	72"	78"	84"
6"	1,150	1,750	2,450	3,250	4,150	5,100	6,300	7,400	8,900
12"	2,300	3,500	4,900	6,500	8,300	10,200	12,600	14,800	17,800
18"	3,400	5,200	7,400	9,700	12,400	15,300	19,000	22,200	26,600
24"	4,600	7,000	9,800	13,000	16,600	20,400	25,200	29,600	35,500
30"	5,700	8,700	12,300	16,200	20,700	25,500	31,500	37,100	44,400
36"	6,800	10,400	14,800	19,400	24,800	30,600	37,800	44,500	53,300
42"	8,000	12,200	17,200	22,700	29,000	35,700	44,100	51,900	62,200
48"	9,100	13,900	19,700	25,900	33,100	40,800	50,400	59,300	71,000
54"	10,300	15,700	22,100	29,200	37,300	45,900	56,700	66,700	79,900
60"	11,400	17,400	24,600	32,400	41,400	51,000	63,000	74,100	88,800
66"	12,500	19,100	27,100	35,600	45,500	56,100	69,300	81,500	97,700
72"	13,700	20,900	29,500	38,900	49,700	61,200	75,600	88,900	106,600
78"	14,800	22,600	32,000	42,100	53,800	66,300	81,900	96,300	115,400
84"	16,000	24,400	34,400	45,400	58,000	71,400	88,200	103,700	124,300
90"	17,100	26,100	36,900	48,600	62,100	76,500	94,500	111,200	133,200
96"	18,200	27,800	39,400	51,800	66,200	81,600	100,800	118,600	142,100
	190	290	410	540	690	850	1,050	1,235	1,480
	Coil Weight Per Inch of Width (lbs)								

Estimated Coil Weight by Stock Thickness For Coil Cradles

Stock Thickness	Maximum Coil Weight Per Inch of Width
.023" - .034"	150 lbs.
.035" - .046"	200 lbs.
.047" - .058"	275 lbs.
.059" - .073"	350 lbs.
.074" & Thicker	400 lbs.

All weights as listed above are in pounds (lbs). Weight is based on standard mild cold rolled steel coils having a 20 inch I.D. The weights listed above are estimated, this guide is intended to be used **ONLY** for determining proper coil reel and coil cradle capacities. Actual coil weights may vary with I.D., O.D., width and material.
